

KUSAL KOLAMBAGE

Software Engineering Undergraduate | Full StackDeveloper | MERNStackDeveloper

Location: Matara, Sri Lanka | **Phone:** +94 779 643 177 | **Email:** kolambagekusal@gmail.com

GitHub: github.com/IT24102387 | **LinkedIn:** [LinkedIn Profile](#) | Portfolio : <https://kusalportfolio1.netlify.app/>

PROFESSIONAL SUMMARY

Motivated Software Engineering undergraduate at SLIIT with hands-on experience in full-stack web and mobile development. Skilled in MERN stack (MongoDB, Express.js, React.js, Node.js), Java, Python, and React Native. Experienced in developing real-world applications such as booking systems, management platforms, and AI/ML projects. Strong knowledge of RESTful APIs, OOP principles, database design (MySQL, MongoDB), and SDLC. Proficient in Git/GitHub and collaborative development. Passionate about building scalable, efficient, and user-friendly software solutions.

TECHNICAL SKILLS

Programming Languages	-	Java, Python, JavaScript (ES6+)
Frontend	-	React.js, HTML5, CSS3, Tailwind CSS
Backend	-	Node.js, Express.js
Databases	-	MySQL, MongoDB, SQL Server
Mobile Development	-	React Native, Expo
Tools & Version Control	-	Git, GitHub
Software Engineering	-	OOP, REST APIs, CRUD Operations, SDLC, Responsive UI Design

EDUCATION

BSc (Hons) in Information Technology Sri Lanka Institute of Information Technology (SLIIT)	2024 – Present
G.C.E Advanced Level (A/L) Matara Central College	2019
G.C.E Ordinary Level (O/L) St. Thomas' College, Matara	2019

CERTIFICATIONS

• AIML Stage 1 – SLIIT	Pending
------------------------	---------

SOFT SKILLS

- Team Collaboration
- Communication Skills
- Problem Solving
- Leadership
- Time Management
- Project Coordination

PROJECT EXPERIENCE

Tourism and Hotel Management System | MERN Stack

2026 – Present

Developing a scalable tourism and hotel management platform with user management, booking modules, MongoDB integration, responsive UI development, and REST API implementation.

Tourism & Hotel Management Mobile App | React Native

2026

Built a mobile application using React Native and Expo for hotel booking and camping equipment rental with authentication and API integration.

Audio Equipment Rental System | MERN Stack

2025 – 2026

Engineered a full-stack web application using MongoDB, Express.js, React.js, and Node.js with inventory management, booking management, and role-based dashboard functionality.

Breast Cancer Survival Prediction Model | AI/ML Project

2025

Developed a machine learning model using Python, Scikit-learn, Pandas, NumPy, and Matplotlib for predicting patient survival outcomes through data preprocessing and classification algorithms.

Property Rental Management System | Java + SQL

2025

Built a property rental management system with Java and MySQL for handling property listings, bookings, and database operations with efficient data persistence and retrieval.

Photography Booking System | Java-Based Application

2024

Developed an object-oriented photography booking system using Java with booking management, scheduling workflows, and modular application architecture using OOP principles.

Interactive Arduino-Based Children's Learning Tool

2024

Designed and developed an interactive hardware-integrated educational system using embedded systems and IoT concepts to improve children's learning experience through audio-visual feedback.
